

## MEZZANINE SYSTEMS

# FREE UP VALUABLE FLOOR SPACE WITH PIPE RACKS

MiTek pipe racks are pre-engineered systems that provide elevated support for manufacturing and processing plants requiring large numbers of facility service connections between production and ancillary equipment. Pipe racks are ideal when quick and clean installation of the support steel is required.

## FEATURES

**Heavy-duty square tubing columns** for greater strength.

**Cold-formed C-Channel framing** for greater strength per pound.

**Installation-friendly** design.

**Superior powder coat finish** with 8 standard colors and custom options available.

**Galvanize or add a zinc primer** to increase rust resistance for external applications.

## KEY BENEFITS

- PE-stamped design
- For all seismic zones
- Designed to maximize steel efficiency while supporting required loads
- No production downtime during installation
- Manufactured in our purpose-built fabrication plant, providing a cost savings to you
- Quality and longevity of structural components are guaranteed by a limited warranty

## DESIGNED TO SUPPORT

- Elevated mechanical piping
- Conduits
- Cable trays
- Ducting
- Overhead facilities support systems
- Piping over rail spurs
