MITEK STEEL PLATFORMS: WHERE EXPERIENCE MEETS QUALITY

Smart steel floor solutions. Steel platforms optimize space without extensive building modifications or the burden of moving. Whether you're looking to transform an existing site or support automation and robotics, we have the experience and ingenuity to implement your ideal solution.

MiTek Mezzanine Systems, part of Berkshire Hathaway, uses nearly 40 years of experience to design, make, and build steel platform solutions. With offices in North America, the UK, and Germany, we are a global leader with a commitment to ongoing research and development. Known for quality and customization, our steel structures optimize industrial, distribution, and manufacturing productivity through a straightforward installation process.

THE MITEK DIFFERENCE

- **Space Optimization:** Our solutions seamlessly integrate into your building's unused space.
- **Project Security:** As part of the MiTek® group, our global service network accommodates your projects with minimal commercial risk.
- **Customer Service:** Our professional engineers prioritize safety, our design team customizes products to your needs, and our project managers provide exceptional installation support.
- **Industry Collaboration:** We are a member of the American Institute of Steel Construction (AISC), American Welding Society (AWS), Material Handling Industry (MHI), Storage Manufacturers Association (SMA), and Material Handling Equipment Distributors Association (MHEDA).
- **Industry Recognition:** We have been repeatedly honored as MHEDA's Most Valuable Supplier, underscoring a commitment to our partners, employees, and community.

DESIGN

Tailored to customer needs, innovative, and fully code-compliant. Our in-house Professional Engineers (PEs) use cutting-edge technology to develop platforms that meet or exceed all regional codes, ensuring safety, reliability, and durability. As your dedicated partner, we provide ongoing communication and strategize collaboratively throughout the design phase with meticulous attention to detail. This ensures that the final result fits your operational needs and building layout.

Our engineers and designers leverage cutting-edge technology, including AutoCAD, Tekla, SAP2000, and proprietary software, such as MiMezz and Nexus. In addition to in-house PEs, we tap into a vast partner network with licenses spanning all 50 states and Canada. PE-stamped drawings and permit packages are readily available, ensuring compliance and a streamlined process.

MITEK'S DESIGN EXCELLENCE

- **True Moment Connections:** Proprietary beam-to-column connections eliminate bracing to provide flexible spaces with proven strength.
- **High-Seismic Design:** We assure strength through exclusive and validated connection designs for the most challenging seismic zones.
- **Meets Requirements:** Our platforms are OSHA-compliant and are designed to meet local, national, and international codes.
- **A One-Stop-Shop:** All 50 PE stamps and the District of Columbia are available in-house.
- **Versatility:** We offer multiple framing designs, including proprietary C-channel, wide-flange, and hybrid options.

ENJOY A BRACE-FREE DESIGN AND AVOID CLEARANCE ISSUES
WITH MITEK'S MOMENT CONNECTIONS.

MAKE

Complete, in-house manufacturing services from MiTek. We make high-quality, custom steel platforms with a variety of finishes in our 106,000-square-foot Wisconsin facility. Our in-house manufacturing services and nearly 40 years of experience enable us to offer customized yet affordable systems.

As a certified American Institute of Steel Construction member, we have been vetted through a rigorous evaluation process, are subject to yearly reviews, and have access to technical support in design and fabrication. We also hold certifications from the American Welding Society (AWS), a nonprofit organization that boasts the latest resources for professionals worldwide.

MITEK'S MANUFACTURING ADVANTAGE

- **Services:** Fabricating, shearing, sheet metal forming, plasma cutting, drilling, welding, working with hot- or cold-rolled steel and various metals, and powder-coat paint-finishing operations.
- **Fabrication Equipment:** We cut our steel with a Bystronic laser that includes an automated loading and unloading system with the ability to operate lights out.
- **Welding Equipment:** We utilize all Miller welders in an overhead gantry, dual-feed format to increase efficiency.
- **Paint Equipment:** A 500-foot conveyor drives our powder-coat paint system. A 3-stage wash process starts the paint process to prep for powder application, and a finish-curing oven seals the product for long-lasting, maintenance-free use.
- **Finish Specifications:** Customers can choose from powder coat, zinc primer and powder coat, or hot-dipped galvanized finishes.
- **Color Options:** Specify a custom color, request a color-matched shade, or choose from eight standard color options.

PURPOSE BUILT MANUFACTURING PLANT, DESIGNED AND OPTIMIZED TO BUILD ONE PRODUCT.

BUILD

Providing peace of mind. MiTek's turnkey service supplies and manages your platform project installation using one of our preferred installation partners. Our experienced, OSHA-certified Field Service Representative (FSR) team is one of the reasons we shine in customer service and satisfaction. We will oversee the installation process, provide general staging and assembly guidelines from a certified installation expert present on site, or offer technical communications based on client needs throughout the process.

We tailor platform installation solutions to meet your specifications, as each project and customer is different. You can choose from managed, supervised, or self-installation. Based on your needs, we will either oversee the entire process, provide general staging and assembly guidelines from a certified on-site installation expert, or offer technical support via phone. We are available to subcontract the installation in most U.S. states.

MITEK'S CUSTOM INSTALLATION OPTIONS

- **Managed installation:** MiTek handles the steel platform installation on behalf of the customer, with a dedicated Project Manager assigned to your project.
- **Supervised installation:** An FSR is available to visit the site, assist your installers, and make sure projects stay on track.
- **Self-installation:** MiTek steel platforms are ready to assemble without field welding, and comprehensive installation drawings are included in each customer's design pack. Technical installation guidance is only a phone call or email away whenever questions arise.

"MITEK SUPPORTED US WITH EXCELLENT COMMUNICATION, WELL-PLANNED DELIVERIES AND SUPERIOR ON-SITE SUPPORT."

James Powers, Project Manager, Siggins

PRODUCT OVERVIEW

As you would expect from a full-service steel platform supplier, we provide an array of options and accessories to elevate your experience. These include decking alternatives, access solutions, edge protection, and pallet gates in diverse finishes and color options. Every detail is meticulously crafted to align with your requirements.

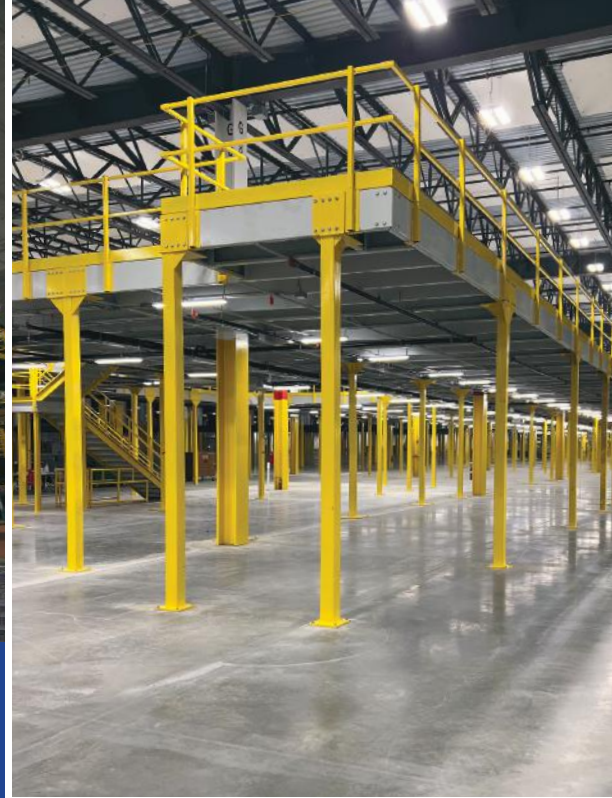

As the authority in steel platform systems, our skilled engineers and designers know how to integrate essential components into your unique platform. Your project will be constructed to exact specifications, with no compromises on functionality.

MITEK'S PRODUCT FEATURES

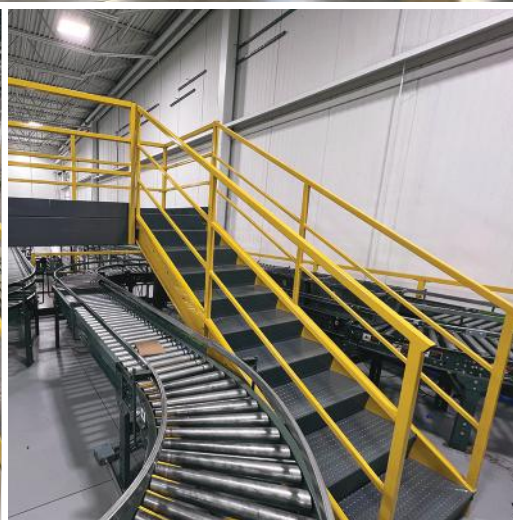

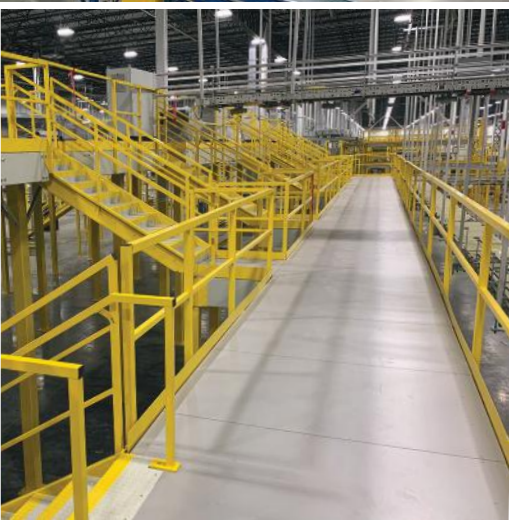

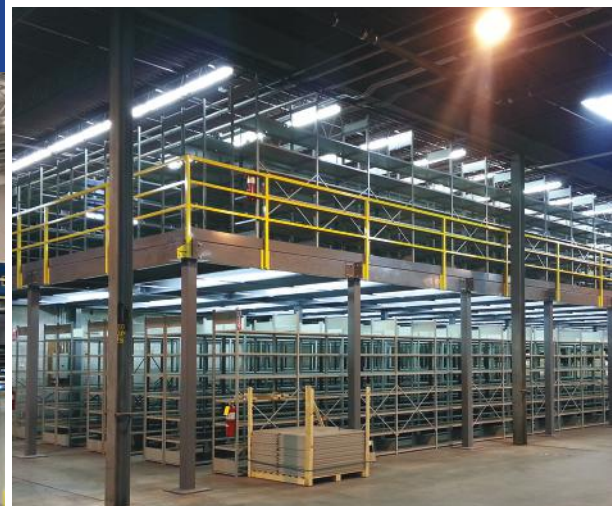

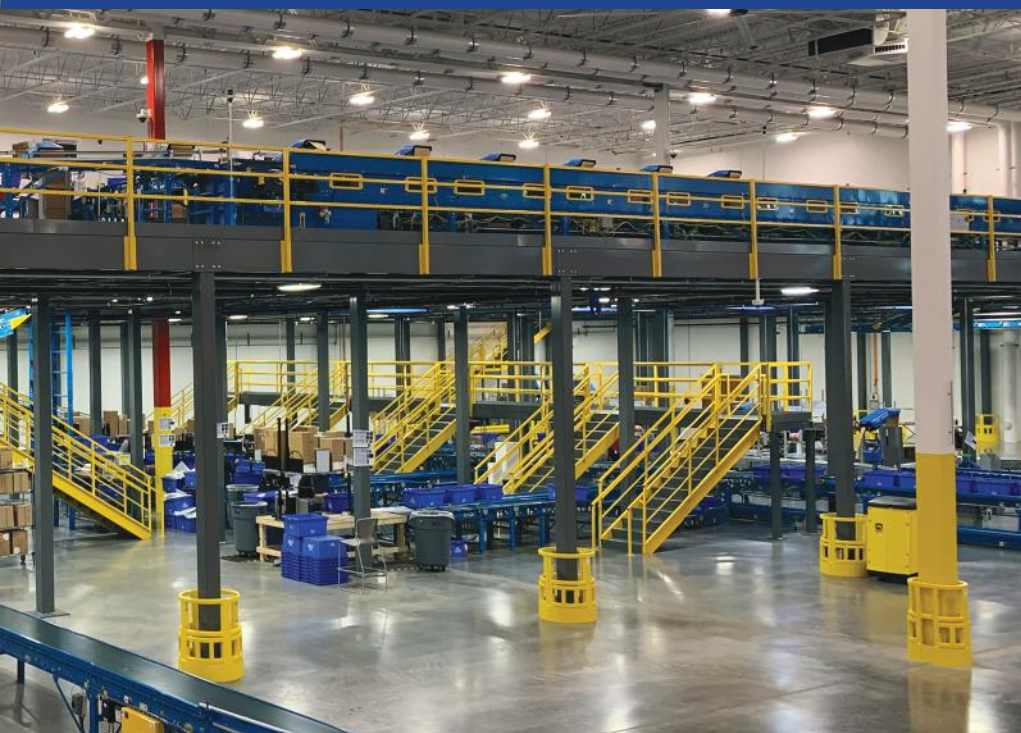

- **Stairs.** We offer IBC- and OSHA-compliant stairs.
- **Ladders.** We offer vertical ladders with or without cages as well as ships ladders.
- **Guardrails.** We offer code-compliant 2-level, 3-level, and vertical balusters.
- **Decking.** We offer a wide variety of decking options including composite wood, steel plate, bar grating, and ready-to-pour concrete.
- **Safety Gates.** We offer swing, slide, and pivot safety gates in a variety of sizes.

MITEK – THE RIGHT DESIGN

DIVERSE APPLICATIONS

WHO WE ARE

MiTek, part of Berkshire Hathaway, is a global company focused on transforming the construction industry through creative solutions that meet the demand for smarter, more affordable and more sustainable buildings. We provide engineered products, integrated software, services and automated solutions for the building industry worldwide. Innovating and expanding into aspects of global building, MiTek empowers customers to improve the way they design, make and build.

Based in North America and Europe our team of dedicated specialists collaborate to design, manufacture and install innovative and future-proofed steel platform systems for commercial and industrial applications. Our solutions secure competitive advantage by optimizing space utilization and boosting productivity. Customers include warehouse developers, general contractors, system integrators and end users worldwide. With nearly 40 years' experience from more than 20,000 projects, MiTek is your experienced partner when it comes to the integration of automated technologies and the realization of large or complex platform projects.
